Allowable Subject Matter

3. Claims 1-6 allowed.

The following is an examiner's statement of reasons for allowance:

The claims are deemed to be a distinct and unobvious improvement over US 5119680. The claims comprises a mounting structure having an internally threaded collet comprising a second bearing surface that bears on the first bearing surface when the internally threaded collet is threaded onto a pressure port, causing the conical open end to bear on a conical mating surface of the pressure port and a housing that captures the internally threaded collet on the cylindrical pressure sensor cavity,

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patents 2618978, 4005847, 4901761 and 3595584 teach pressure sensor transducers having pressure sensor/gauge mounting structures.
